PENDANT LIGHT

Illuminate your world with the new metal pendant light by fe studio. Whether it is kitchen, living room or office space, skope adds sophistication & elegance. The light spread out has a softening effect as we chose a mocca shade for the interior of the fixture. For the outside we offer 8 different colors to match your design style, from classic to vibrant tones.

fe studio takes items we use on a daily basis and carefully reshapes them; as we wish to submit design as a way of life. Our need for aesthetics, the beauty in detail, the joy of color, ergonomics and functionality ; all these are part of the design language of fe studio.

All items are handmade, manufactured in local factories.
